City properties incur water leak damage

In January, noxious odors were noticed by the staff at City Hall, and a water leak was discovered which apparently was long standing and not noticeable to the naked eye.

Panorama utility department workers began ripping out fixtures and flooring to determine the extent of the damage. We contacted Reagan Environmental to investigate. Reagan determined there is contamination in several areas of City Hall.

While Reagan was on site, they were asked to look at the Clubhouse too. We had become aware of some potential contamination in the ceiling of the Club,

possibly caused by mist from A/C ducts. Reagan observed damage in the top of the Club that can only be accessed by scaffolding. For this reason, it will be necessary to close the clubhouse and City Hall for repairs.

The successful bidder has opted to begin work on the Clubhouse first and take care of City Hall after that. They will begin "demo" on the Club Monday, March 8 and should be finished in approximately 5 days. Then we will have to get bids for the repairs on the clubhouse. Demo on City Hall will begin as soon as bids are received and evaluated. Repair work on City Hall will follow that phase.
